Candidate ruminant features: bile-acid synthesis and de novo lipogenesis zonation, cow vs controls
(values scaled by each animal's own CYP2E1+CYP1A2 gradient; animals failing axis QC excluded: COW-C1, BOAR-P2)

cow, this study (95% block-bootstrap CI) · cow Visium · pig · human · mouse

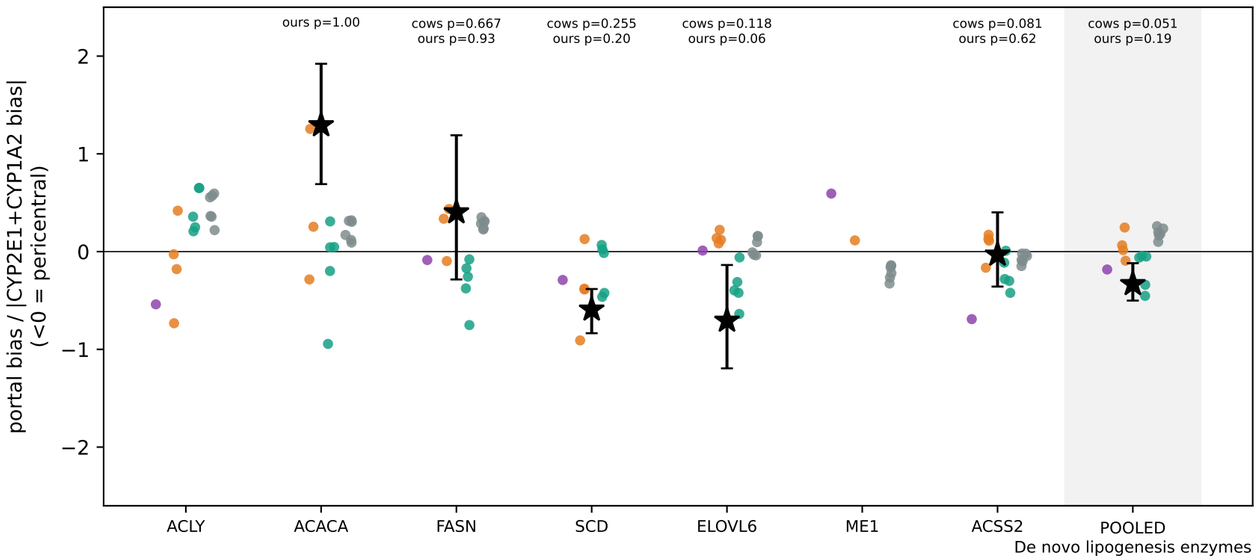

A Bile-acid synthesis enzymes

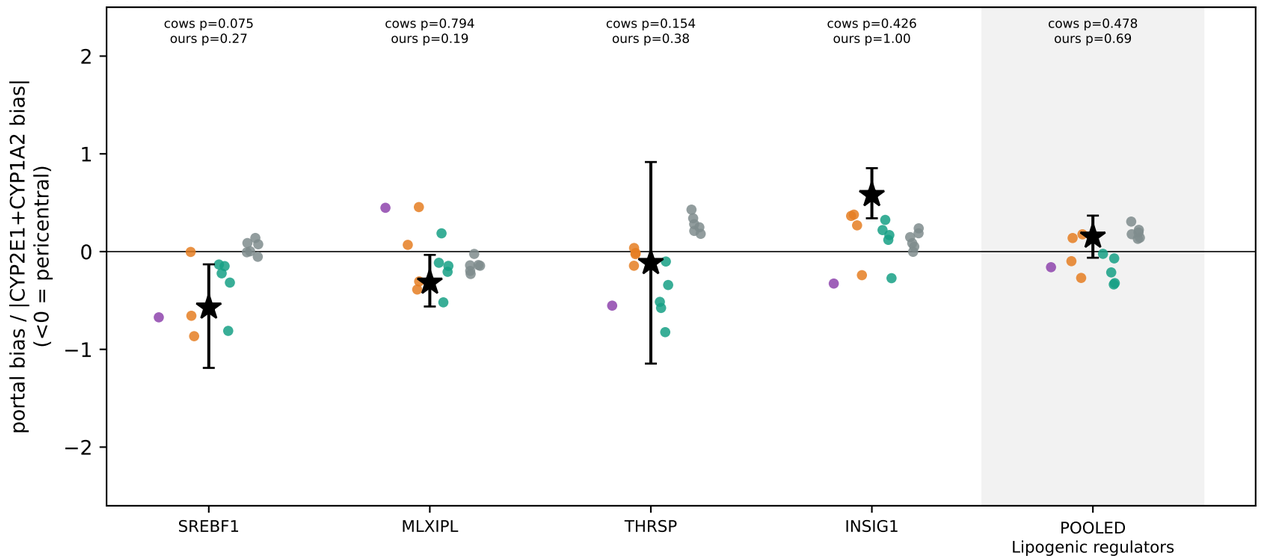

B Bile-acid regulation / transport

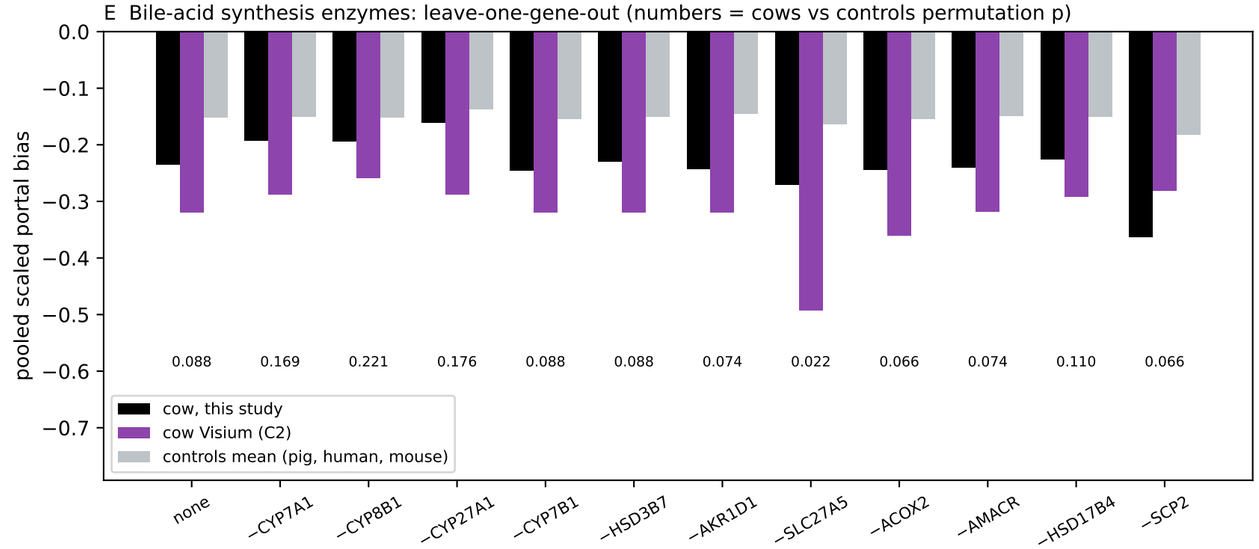

C De novo lipogenesis enzymes

D Lipogenic regulators

E Bile-acid synthesis enzymes: leave-one-gene-out (numbers = cows vs controls permutation p)

F De novo lipogenesis enzymes: leave-one-gene-out (numbers = cows vs controls permutation p)
